

SaaS Management Platform for Office 365 and other SaaS

Committed to helping enterprise organizations maximize their SaaS investments

It's easy to overlook the untapped potential of enterprise software or get bogged down in provisioning and maintenance. It's our mission to help you streamline and automate the day-to-day, so you can fully leverage your investment, enhancing administration, security, reporting, and change management.

What makes CoreView different?

- Unified Dashboard
- Microsoft Gold Partner
- Efficient management - licenses, tenants, users, security policies

“For the money spent to the value received, CoreView has provided us the biggest ROI for any of our IT management tools by far.”

*VP of Information Technology,
AccuWeather*

SaaS Management Platform

Assists to:

- Consolidate many O365 Admin Center consoles on a single pane of glass
- Discover SaaS applications in use as Shadow IT apps wastes money and creates security risk
- Segregate O365 admin privileges based on regions, departments, or other functional needs
- Accurately attribute costs to departments for chargebacks
- Optimize SaaS Adoption with users productive with Teams
- Monitor settings to find mis-configurations and user activity to prevent breaches
- Scan and Tag storage repositories with Taxonomy to comply with GDPR and CCPA
- Automate user account workflows to eliminate tedious tasks that are error prone and easily remove accounts to remove security risks and wasted spending
