

# Kaspersky Lab Activation Guide

© 2018. All Rights Reserved. Ingram Micro Inc.

## This guide

This guide walks you through the following steps:

- Activating your reseller account for Kaspersky Lab transactions on the Ingram Micro Cloud marketplace
- Downloading and activating Kaspersky Lab products for your customers

## Activate your reseller account

Before you purchase Kaspersky Lab subscriptions for your customers, you must activate your Reseller account for Kaspersky Lab orders. The activation process prompts you to specify your Kaspersky Lab Partner ID. If you don't have a Partner ID or don't know what it is, contact Kaspersky Lab at one of the following email addresses:

Country	Email
United Kingdom	<a href="mailto:B2B@kaspersky.com">B2B@kaspersky.com</a>
France	<a href="mailto:B2BChannelFR@kaspersky.com">B2BChannelFR@kaspersky.com</a>
Germany, Austria	<a href="mailto:salesdach@kaspersky.com">salesdach@kaspersky.com</a>
Netherlands, Belgium	<a href="mailto:sales@kaspersky.nl">sales@kaspersky.nl</a>

### Steps

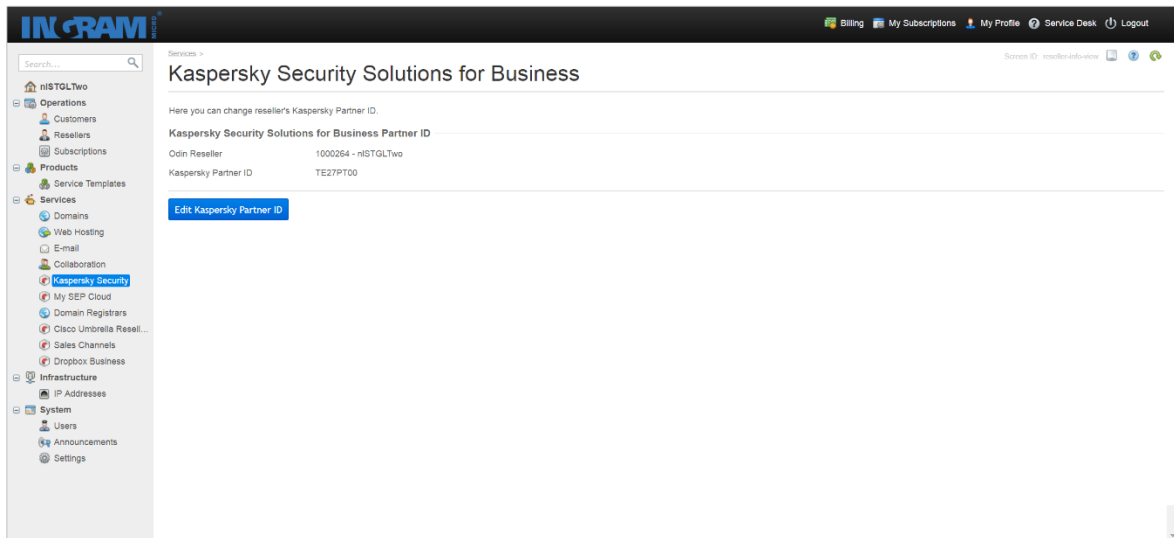

To activate your Reseller account:

1. Log into the Ingram Micro Cloud **Reseller Control Panel**.  
**Note:** Kaspersky Lab activation is currently only available through the Classic control panel, not through UX1.
2. From the top navigation bar, click **Operations**.

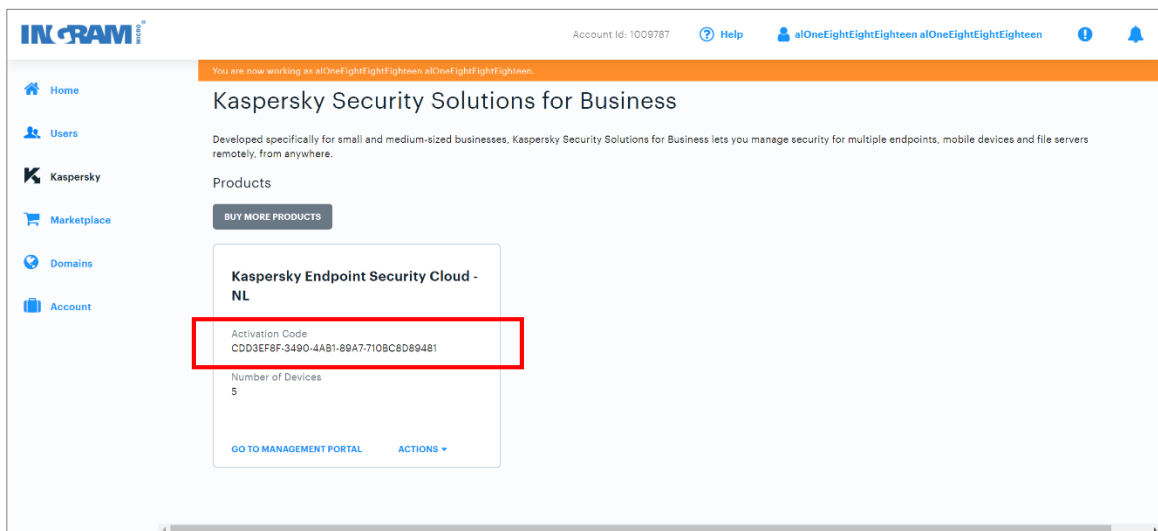

## Kaspersky Lab Reseller Activation Guide – Ingram Micro

3. From the left navigation bar, click **Kaspersky Security**.
4. Enter your Kaspersky Partner ID.

## Activate Kaspersky Lab products

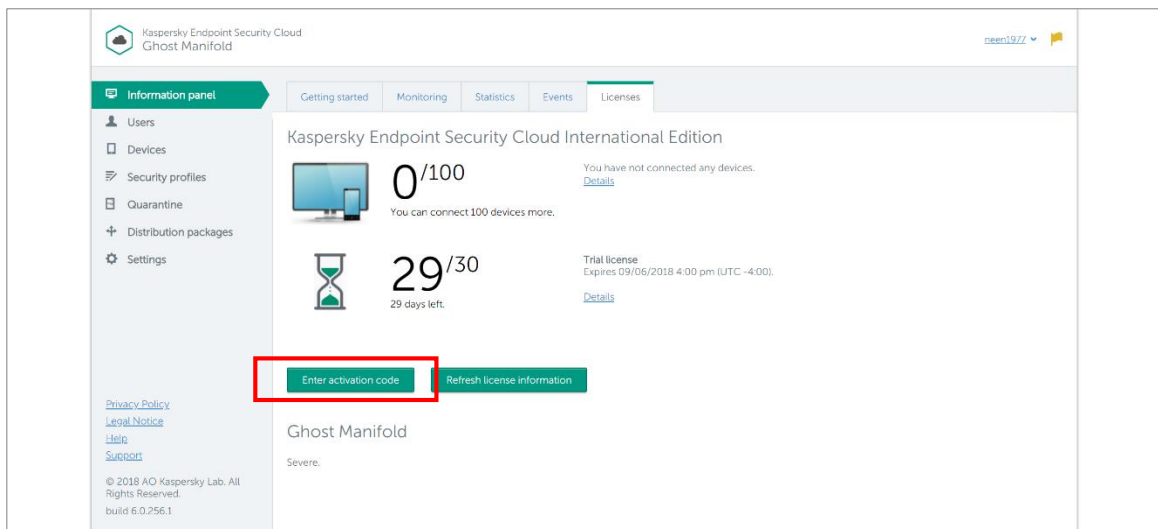

Ingram Micro provides you with an activation code for each Kaspersky Lab product that you purchase. To activate a product after you purchase it for a customer, you download the product from Kaspersky Lab and enter the activation code.

Activate Kaspersky Endpoint Security Cloud and Kaspersky Security for Office 365  
These products are managed from the Kaspersky Business Hub at the following URL:  
<https://cloud.kaspersky.com>

## Steps

1. Sign up for a Business Hub account (you'll receive an email from Kaspersky.com with an account activation link).
2. Sign into the Business Hub, accept the Terms of Use, and confirm your country.
3. Select which product you want to download, and accept Kaspersky's legal agreements and privacy policy.
4. Create a workspace by providing some information about yourself and your company (you'll receive an email with a link to the workspace when it's provisioned).
5. Go to the workspace, and accept the end user license agreement for the product.
6. Enter proxy server settings if required.
7. Accept the Kaspersky Security Network Statement.
8. In your company workspace, go to the Licenses area of the Information Panel, and enter your activation code.

The product switches from a trial license for 100 devices, to a paid license for the number of devices that you purchased.

9. When you add users, they receive emails from Kaspersky with links to download products. Alternatively, you can download distribution packages for installation on devices not associated with a specific user.

## Activate other Kaspersky Lab products

Activate the following Kaspersky Lab products by downloading them from a publicly available URL and entering the activation code during the local installation and configuration process.

Product	URL
Kaspersky Endpoint Security for Business – Select	<a href="https://www.kaspersky.com/small-to-medium-business-security/downloads/endpoint-select">https://www.kaspersky.com/small-to-medium-business-security/downloads/endpoint-select</a>
Kaspersky Endpoint Security for Business – Advanced	<a href="https://www.kaspersky.com/small-to-medium-business-security/downloads/endpoint-advanced">https://www.kaspersky.com/small-to-medium-business-security/downloads/endpoint-advanced</a>
Kaspersky Security for Mail Server	<a href="https://www.kaspersky.com/small-to-medium-business-security/downloads/mail-server">https://www.kaspersky.com/small-to-medium-business-security/downloads/mail-server</a>
Kaspersky Hybrid Cloud Security, Desktop Kaspersky Hybrid Cloud Security, Server Kaspersky Hybrid Cloud Security, CPU Kaspersky Hybrid Cloud Security Enterprise, Server Kaspersky Hybrid Cloud Security Enterprise, CPU	<a href="https://www.kaspersky.com/small-to-medium-business-security/downloads/virtualization-hybrid-cloud">https://www.kaspersky.com/small-to-medium-business-security/downloads/virtualization-hybrid-cloud</a>
Kaspersky Security for Internet Gateway	<a href="https://www.kaspersky.com/small-to-medium-business-security/downloads/internet-gateway?utm_content=downloads">https://www.kaspersky.com/small-to-medium-business-security/downloads/internet-gateway?utm_content=downloads</a>
Kaspersky Small Office Security	<a href="https://www.kaspersky.com/small-business-security/downloads/small-office-security">https://www.kaspersky.com/small-business-security/downloads/small-office-security</a>

## Steps

1. You can deploy and configure Kaspersky Security Center to accurately maintain your licenses. Follow the steps below to install Kaspersky Security Center and monitor your protected endpoints for licensing purposes only.
2. Install Kaspersky Security Center Administration Server
3. Add the activation code to Security Center
4. Configure your perimeter security to allow communication between Security Center and Kaspersky Security Center Network Agent via the necessary networks ports.
5. REMOVE the Kaspersky Endpoint Security for Windows Protection Policy from the Managed Computer Group to prevent issues with protection policy settings already configured for the endpoints.
6. Create a Virtual Admin Server for each customer

7. Create a stand-alone package for the Kaspersky Security Center Network Agent for each customer workspace.
8. Deploy it to all protected endpoints using standard Kaspersky Security Center methods or third-party tools.
9. Confirm that Kaspersky Security Center Network Agents are actively communicating with the Kaspersky Security Center.
