The bridge to possible

Calling in Webex

Welcome to the all new Webex

Webex brings everyone together to do exceptional work: One easy-to-use and secure app to call, message, meet and get work done. In real-time or anytime, Webex is the engaging, intelligent and inclusive app that creates exceptional experiences and makes working together distinctly better.

Enabling continuous collaboration from a simple call

Communication and collaboration go hand in hand. When you call on Webex—in the office, at home, or on the go—you'll have the same calling features to keep your business moving. If you're on a phone call you can easily elevate it into a full-featured meeting to take advantage of AI transcriptions, real-time translations, notes and action items, and recordings. Stay connected and productive with Webex.

Innovative calling features deliver exceptional experiences

Standard business calling features:

- Call waiting/call transfer: View who is calling and seamlessly transfer calls to another colleague

- Merge and conference: Merge calls or easily go from 1:1 to conference mode

- Business voicemail: Connect to your voicemail, view waiting messages, and access visual or non-visual voicemail, all with a single click

- Hunt group, Call queues: Leverage multiple phone lines in a group to make sure every call is answered. Manage availability—log in and out on the Webex app

- Multiline, Boss/Admin: Easily manage multiple lines or set up the ability for admins to manage incoming calls

- Call park: Park a call on one device and retrieve it from another device

- Call pickup: Pick up someone else's call

- Call recording

- Move/pull calls between devices with shared lines

- Set your business calls to ring at any number

Enhanced unified collaboration features:

- Elevate a 1:1 telephone call to a video meeting

- Background noise removal and virtual/custom backgrounds

- Control your paired desk phone or room systems device settings

- Application sharing with annotation and whiteboarding
