

# Meetings in Webex

## Welcome to the all new Webex

Webex brings everyone together to do exceptional work: One easy-to-use and secure app to call, message, meet and get work done. In real-time or anytime, Webex is the engaging, intelligent and inclusive app that creates exceptional experiences and makes working together distinctly better.

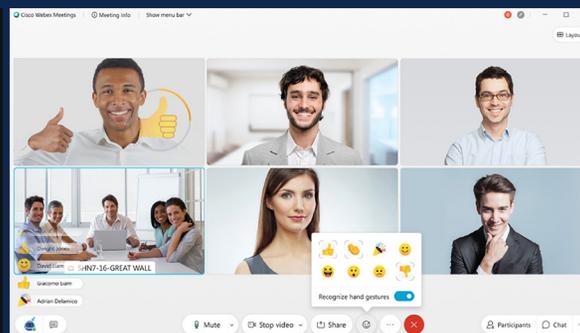

## Experience video conferencing that is 10x better than being there

Meetings in Webex provide you with high-definition audio and video. It's important to be present during your workday conversations, and meeting face to face helps you do just that. It turns a colleague's name on a screen into a live, collaborative video meeting.

Figure 1. 5x5 grid view in Webex lets you see everyone

Figure 2. Reactions and gesture recognition in Webex lets you send non-verbal feedback into the meeting

## Benefits

- **Security** – Have peace of mind that your conversations are being held on a platform with end to end encryption
- **Flexibility** – work from anywhere, on any device, at any time
- **Intelligence** – Artificial intelligence to automate tasks and personalize experiences
- **Engaging** – Screen share, white board and separate into breakout rooms for richer collaboration
- **Inclusive** – deeply integrated with popular productivity and learning tools

## Get started

[Sign up today](#) and experience how the all new Webex brings everyone together to do exceptional work.

For information on messaging in Webex visit <https://www.webex.com/team-collaboration.html>.

For information on calling in Webex visit <https://www.webex.com/cloud-calling.html>.

## What it does

### High quality video conferencing

Enjoy simple, video first meetings with multi-stream high-definition audio and video. Be anywhere and reach anyone on any device – desktop, mobile, web, video devices – with easy, consistent experiences.

### 2-way collaboration

Share your screen, co-create on a whiteboard, separate into [break-out sessions](#) and receive instant non-verbal feedback with [reactions and gestures](#).

### Have great meetings in the tools you love

Webex integrates with Microsoft Teams, Slack, Google, ServiceNow, Salesforce, and many others. Meet where you learn in learning management systems such as Canvas, Moodle and Blackboard.

### AI does the heavy lifting

- [Webex Assistant](#), your digital in-meeting assistant, will automate common tasks such as note-taking and meeting highlights, so you can focus on the meeting
- Language is no longer a barrier with real-time translations in Webex – from English to 100+ languages
- With [noise removal](#) and speech enhancement, annoying disruptions like dog barking, lawn mowers, and rustling paper, will be a thing of the past – so you can send the best audio into your meeting
- People Insights gives you more context with relevant, professional and up-to-date data on your meeting participants

### Work together securely

Webex is built with Cisco's industry-leading security. A global architecture and network help ensure speed and performance so you'll get secure, high-quality video meetings without compromise.
